N&WICS - TA536 - Alectinib - Non-small-cell lung cancer

Before providing patient identifiable data on this form, please confirm that the patient (or in the case of a minor or vulnerable adult with the parent/legal guardian/carer) has given appropriate explicit consent for sensitive personal information on this form to be passed to the CCG and/or CSU for processing this funding request and validating subsequent invoices. Consent given: ☐

If there is more than one NICE-approved treatment available, a discussion between the responsible clinician and the patient has taken place about the advantages and disadvantages of the treatments available. This has taken into consideration therapeutic need and whether or not the patient is likely to adhere to treatment. The most appropriate, least expensive, will be chosen (taking into account administration costs, dosage and price per dose) unless an order of preference is stated in the TAs. ☐

By completing this form, you confirm that you intend to use the requested medicinal product described below as agreed in the local commissioning statement. Any requests which fall outside of this use will require an individual funding request (IFR).

For support regarding IFRs, please contact: norfolkicd@nhs.net

For support regarding the criteria listed below, please contact: norfolknontariff@nhs.net

Please indicate whether patient meets the following NICE criteria:	Please tick
<p>1. Alectinib is recommended, within its marketing authorisation, as an option for untreated anaplastic lymphoma kinase (ALK)-positive advanced non-small-cell lung cancer (NSCLC) in adults. It is recommended only if the company provides alectinib according to the commercial arrangement.</p> <ul style="list-style-type: none"> • Why the committee made this recommendation • People with untreated ALK-positive advanced NSCLC are usually offered crizotinib. • The main evidence for alectinib comes from an ongoing clinical trial. This suggests that alectinib is more effective than crizotinib in delaying disease progression, including in the central nervous system. There is not enough evidence to tell how long alectinib prolongs life compared with crizotinib. • There is uncertainty about how treatments after disease progression affect people's quality and length of life. But using the most plausible assumptions and with the commercial arrangement, the cost-effectiveness estimates for alectinib compared with crizotinib are within the range NICE normally considers acceptable. Therefore, alectinib is recommended for untreated advanced ALK-positive NSCLC. 	<input type="checkbox"/> Yes <input type="checkbox"/> No
<p>2. As per NICE guidance, treatment should normally be started with the least expensive drug (considering the dose required, price per dose and any additional administration costs).</p> <p>Please confirm that the choice of drug is considered the most cost-effective treatment for this individual patient, noting that alternative treatment options recommended by NICE may be lower in cost, including the use of biosimilar medications if applicable.</p> <p>Where an alternative lower cost treatment is available and has not been tried by the patient, please confirm that the clinical rationale for prescribing has been included in the patients' medical record for the purpose of auditing.</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No
<p>3. The product is being used as described by local commissioning position.</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No
I confirm that the patient meets the criteria for treatment
